As [H⁺] decreases by 10x, pH increases by 1 pH unit
 As [OH⁻] increases by 10x, pOH decreases by 1 pOH unit

} this is called a logarithmic scale

- the lower the pH, the higher the concentration of [H⁺] and the stronger the acid
- the lower the pH, the lower the concentration of [OH⁻] and the weaker the base
- the lower the pOH, the higher the concentration of [OH⁻] and the stronger the base
- the lower the pOH, the lower the concentration of [H⁺] and the weaker the acid
- for any solution, the pH + pOH = 14
- for any solution, the [H⁺] x [OH⁻] = 1.0 x 10⁻¹⁴
